

SHADE AND MEMBRANE STRUCTURES AUSTRALIA

Council Shade Solutions

shadeandmembrane.com.au

SHADE SOLUTIONS

Shade and Membrane Structures Australia build quality shade solutions for local government and regional councils throughout Australia and beyond. A Shade and Membrane Structures shade solution provides year-round protection from the elements for your space; whether it is a bespoke solution for a sporting complex, swimming pool shade sails or a covered car park. Our shade structures are custom designed for each site; this means that we can provide you with the best possible solution for your shade needs, no matter your location or design.

For quality in design, manufacture and construction, you cannot go past the experience and demonstrated capability of the SMSA team.

LEADERS IN SHADE SOLUTIONS

Options to suit every site

We manufacture shade structures in HDPE Shade Cloth, Waterproof PVC or PTFE Tensile Membrane Fabrics or in Traditional Colorbond Roofing. We can also design, manufacture and construct solar shade structures that provide solar electricity to offset your power consumption.

All Australian Design & Construction

Our process is completely Australian. We design all our structures in house; our engineering is done by local firms, and our steel fabrication is all done within Australia. When it comes to installation, we use our experienced and professional in-house installation teams.

BESPOKE DESIGNS

Unparalleled Experience

At SMSA, we have decades of experience in the design and construction of council shade structures. Our proven track record includes playground hip and ridge structures, sports courts, shade sails, amphitheatres and covered outdoor learning areas (COLA's).

Cost Effective Solutions

Our experience means that we can design shade solutions that are cost effective whilst maintaining the highest possible quality and sun protection. Our solutions will exceed your expectations in architectural design, quality of materials and customer service.

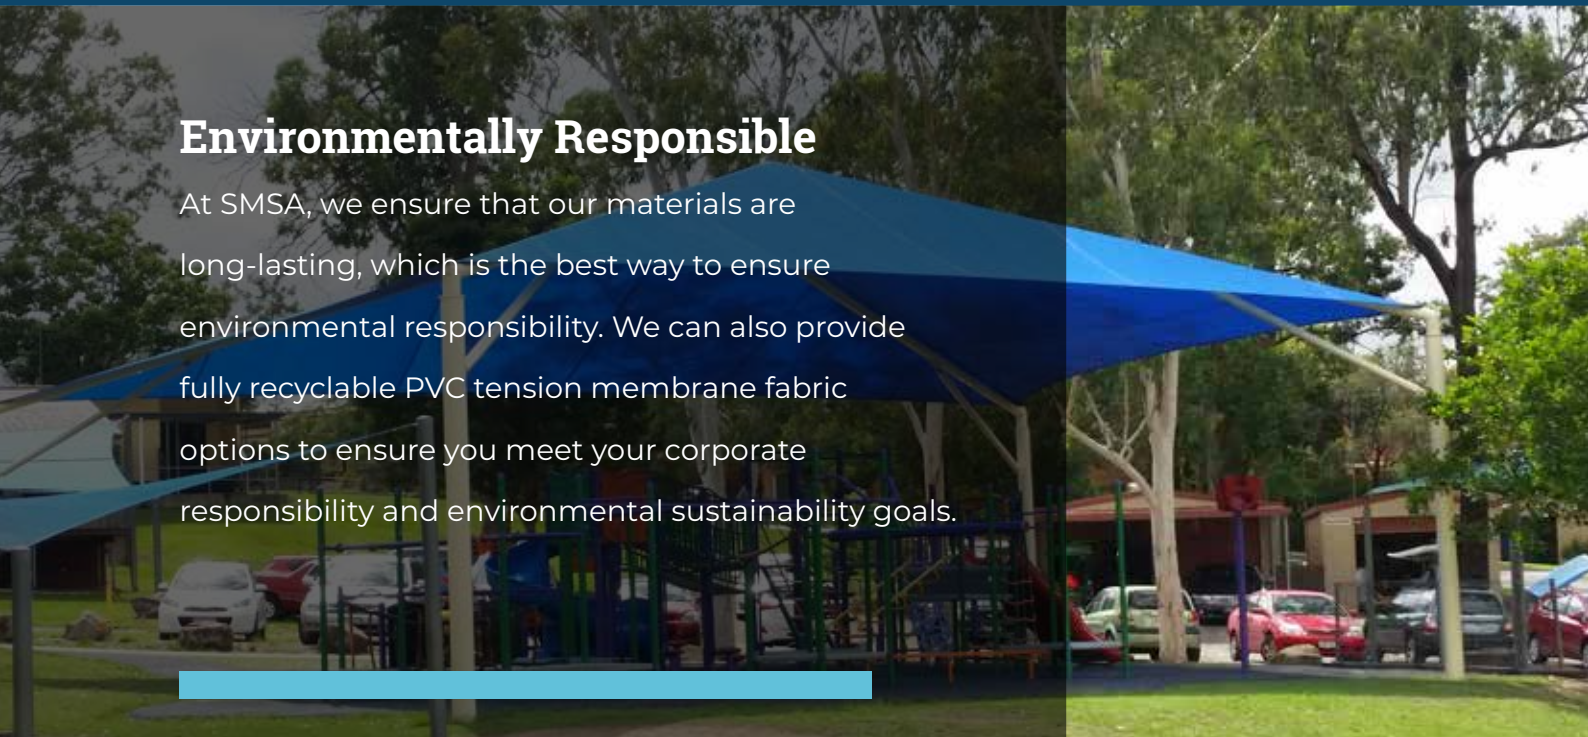

Flexibility in Design

Our team are experienced in diverse range of designs. All of our structures are designed specifically for your project, whether it be a cost-effective playground shade structure or an architecturally designed statement structure. Our experience, diverse fabric options and premium engineering mean that no matter what your project is, we can create a design that will exceed your expectations.

Environmentally Responsible

At SMSA, we ensure that our materials are long-lasting, which is the best way to ensure environmental responsibility. We can also provide fully recyclable PVC tension membrane fabric options to ensure you meet your corporate responsibility and environmental sustainability goals.

Design Specifications

Engineering	Full engineers' certification with all of our shade structures.
Fabric	Premium Quality PVC (Poly Vinyl Chloride) membrane or HDPE (High-Density Polyethylene) available depending on the needs of your site.
Steel	High-grade steel finished to your specifications. Finishes including HDG (Hot Dip Galvanised), 2-Pack Epoxy or Powder Coat.
Structure Types	Shade Sails, Tension Membrane Shade Structures, Colourbond Steel Structures, Bespoke Shade Structures and Solar Shade Structures.

SMSA
